INDIVIDUAL COURSES TRAINING SERIES

Flat-light, Whiteout, and Brownout Conditions

ROTOR WING

IPAD COMPATIBLE

APPROX 1.0 HRS

The Flat-light, Whiteout, and Brownout Conditions subject provides pilots with essential knowledge of these dangerous meteorological and environmental conditions. The course focuses on identifying each condition, and when they may occur, and includes methods for prevention, mitigation, and how to exit these conditions safely.

The training fulfills the training requirements for Part 135 pilots and provides the basic understanding required to mitigate and combat flat-light, whiteout, and brownout IIMC conditions.
