INDIVIDUAL COURSES TRAINING SERIES

Personal Protective Equipment

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 2.5 HRS

The Personal Protective Equipment (PPE) course covers the OSHA requirements for both employers and employees. You'll learn why PPE is important, how to select and wear PPE correctly, its limitations, and how to properly care for it.

Our Personal Protective Equipment (PPE) course includes three tutorials covering general personal protective equipment, respiratory protection equipment, and fall protection systems. The General Personal Protective Equipment tutorial introduces users to common PPE including eye and face protection, as well as head, foot, and hand protection. Proper fit, care, and limitations of each type of PPE are covered to ensure safety of personnel. The Respiratory and Fall Protection tutorials provide general use training for these types of PPE.

TUTORIALS

General Personal Protective Equipment

1. Introduction to PPE
2. Types of PPE and their Uses
3. Wearing PPE
4. Limitations
5. Proper Care and Storage

Respiratory Protection

1. Respiratory Protection Overview
2. Types of Respirators
3. Proper Use and Fit Testing
4. Inspection, Maintenance, and Storage

Fall Protection Systems

1. Fall Protection Overview
2. Proper Use
3. Maintenance and Storage

LESSONS

▶ Comprehensive examination covers subject matter from all lessons

Personal Protective Equipment

1. General PPE
2. Respiratory Protection
