# ADS-B Overview

**FIXED/ROTOR WING**

**IPAD COMPATIBLE**

**APPROX 2.5 HRS**

ADS-B Overview focuses on ensuring pilots have a working understanding of their ADS-B equipment, how to utilize the equipment according to regulatory requirements, what services are available, as well as how to avoid common human factors errors associated with ADS-B. The course will provide pilots with a basic understanding of the system symbols and how to use ADS-B to perform In-Trail and CAVS procedures to include appropriate contingency procedures.

For Part 135, Part 125, and Part 91 pilot training, our ADS-B Overview course provides a foundation of knowledge and understanding for flight crews to ensure proper use of the ADS-B system.

## TUTORIALS

### ADS-B
