CFIT Avoidance

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 1.06 HRS

CFIT Avoidance highlights the risks of controlled flight into terrain and how to avoid it. This course identifies the main causes of CFIT accidents and covers preventative measures to reduce the accident rate such as the use of avionics systems, standard operating procedures, and using a stabilized approach.

For Part 135, Part 125, and Part 91 pilot training, the CFIT Avoidance courses provide a foundation of knowledge and understanding for pilots and crewmembers to avoid controlled flight into terrain.

TUTORIALS

CFIT Avoidance

1. Introduction
2. Outside Factors
3. Combating CFIT

LESSONS

▶ Comprehensive examination covers subject matter from all lessons

CFIT Avoidance

1. CFIT 1
2. CFIT 2
3. Approach and Landing Accident Reduction (ALAR)
