Lockout-Tagout

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 0.5 HRS

Our Lockout-Tagout course covers procedures for affixing appropriate lockout or tagout devices to energy controlling mechanisms in order to disable machines and equipment. These procedures protect employees from injury during servicing or maintenance and is an essential industry safety standard.

For Part 135, Part 125, and Part 91 maintenance training, Lockout-Tagout is necessary for the prevention of personal injury as well equipment damage.

TUTORIALS

Lockout-Tagout
