INDIVIDUAL COURSES TRAINING SERIES METAR and TAF

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 1.8 HRS

The METAR and TAF course provides an introduction to the concept of coded aviation weather reports, the order of their elements, and how to interpret the coded reports. The course will instruct the unfamiliar in how to read a METAR and TAF and, for those already familiar with them, provide a deeper understanding of how these reports work to bring you weather and forecast information.

For Part 135, Part 125, and Part 91 pilot training, our METAR and TAF course provides essential training in understanding coded weather reports and forecasts.

TUTORIALS
