PPE - Respiratory Protection

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 3.0 HRS

Workers have the right to a safe workplace and millions of people each day are exposed to harmful airborne substances while on the job. Our PPE - Respiratory Protection course covers important information on when to use respiratory protection and how to ensure optimal protection through proper use, fit testing, and maintenance and storage. The course also covers what may be considered improper use, limitations, and hazards of respirators, as well as how to use a respirator in an emergency.

For maintenance and ground personnel working in the aviation industry, this PPE - Respiratory Protection course familiarizes workers with the PPE available to them and fulfills OSHA training requirements for the Respiratory Protection program.

TUTORIALS
