

Your Co-Pilot in Aviation Training

Reduced Vertical Separation Minimum

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 1.6 HRS

Our Reduced Vertical Separation Minimum (RVSM) course provides essential knowledge for pilots authorized to operate between FL 290 and FL410. You'll learn how to safely operate with increased airspace capacity and take advantage of more fuel efficient altitudes.

For Part 135, Part 125, and Part 91 pilot training, this course fulfills the training requirements for operations in reduced vertical separation minimum airspace and provides important information on requirements, policies, and procedures for participating in RVSM airspace.

TUTORIALS

Oceanic Contingency Procedures and SLOP

1. Oceanic Contingency Procedures and SLOP

RVSM

- 1. RVSM and Requirements
- 2. RVSM Procedures

- 3. Turbulence, MWA, Communications, and Contingency Actions
- 4. The Effect of RVSM on TCAS

LESSONS

Comprehensive examination covers subject matter from all lessons
