

## COMPUTER TRAINING SYSTEMS

# Your Co-Pilot in Aviation Training

## INDIVIDUAL COURSES TRAINING SERIES **TAWS**

**FIXED/ROTOR WING**

**IPAD COMPATIBLE**

**APPROX 1.1 HRS**

Our TAWS course provides an introduction to the purpose of Terrain Awareness and Warning Systems. It ensures pilots will have a clear understanding of the TAWS functions, what alerts may occur, and how to respond to them. Additionally, we address common issues with TAWS such as Nuisance Alerts and when it is appropriate to inhibit the TAWS.

For Part 135, Part 125, and Part 91 pilot training, our TAWS course provides a foundation of knowledge and understanding for the flight crew to utilize the TAWS system in their aircraft properly. This course meets initial and recurrent training and testing requirements.

## TUTORIALS

### TAWS

1. History
2. Regulations
3. Required Equipment
4. Terrain Database
5. Aircraft Flight Manual Inclusions
6. Caution and Warning

## LESSONS

- ▶ Comprehensive examination covers subject matter from all lessons

### TAWS

1. TAWS
