Your Co-Pilot in Aviation Training

INDIVIDUAL COURSES TRAINING SERIES TCAS II

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 1.0 HRS

TCAS II provides a general overview of what TCAS is, why it was developed, and its safety benefits. The course provides pilots with the basic concepts of TCAS, ensuring that no matter what product they use they'll understand the fundamental purpose of each type of alert and level of protection offered by TCAS I. Finally, the course ensures pilots understand the standard responses to alerts and what problems they may encounter when utilizing a TCAS system.

For Part 135, Part 125, and Part 91 pilot training, our TCAS II course provides a foundation of knowledge and understanding for pilots to use the TCAS II system available in their aircraft.

TUTORIALS

TCAS II

1. History and Development
2. Basic Concept
3. System and Traffic Display
4. Types of RAs
