INDIVIDUAL COURSES TRAINING SERIES

Traffic Advisory System (TAS)

FIXED/ROTOR WING   **IPAD COMPATIBLE**   **APPROX 1.0 HRS**

The Traffic Advisory System (TAS) provides a general overview of what TAS is, why it was developed, and what types of traffic advisories are available. Additionally, the TAS course provides pilots with recommended industry standards for utilizing TAS to see and avoid other aircraft while in the air.

For Part 135, Part 125, and Part 91 pilot training, our Traffic Advisory System (TAS) course provides a foundation of knowledge and understanding for pilots to begin to use the TAS system available in their aircraft. This course can be used to meet initial and recurrent training and testing requirements.

TUTORIALS

Traffic Advisory System (TAS)

1. Introduction to TAS
2. Systems and Equipment Description
3. Traffic Advisories
4. Recommended Actions

LESSONS

▶ Comprehensive examination covers subject matter from all lessons

Traffic Advisory System (TAS)

1. TAS Basics
2. Multi-function Display Symbols and Use
3. Pilot Actions
