# Occupational Noise Exposure

**FIXED/ROTOR WING**

**IPAD COMPATIBLE**

**APPROX 0.8 HRS**

Occupational Noise Exposure provides the necessary training on how hearing works, how noise affects hearing, the requirements for audiometric testing, and hearing protectors. This includes types of hearing protectors, how fit testing works, and general instructions on the proper use of most common types of hearing protection.

Occupational Noise Exposure is intended to be used as part of your employer's Hearing Conservation Program, required under OSHA regulation 29 CFR 1910.95.
