

COMPUTER TRAINING SYSTEMS

Your Co-Pilot in Aviation Training

INDIVIDUAL COURSES TRAINING SERIES

Hazardous Materials

FIXED/ROTOR WING

IPAD COMPATIBLE

APPROX 2 TO 7 HRS

Our Hazardous Materials course provides pilots and ground handling personnel with information to define and identify hazardous materials. We offer courses for will and will-not carry operations, depending on your needs. We offer courses for three different employee groups: Flight Crew and Load Planners, Ground Handling Staff, and Loading Staff

For Part 135, Part 125, and Part 91 initial and recurrent Hazmat training, our Hazardous Materials courses provide an understanding of the responsibilities of the operator and ground handling staff, freight forwarding staff, shippers and packers, and security team in the safe carriage of hazardous materials. Each of our Hazmat courses aligns with the training requirements for each job function specified in Part 121, Appendix O.

TUTORIALS

Hazardous Materials Awareness

1. General Philosophy
2. Limitations
3. Labels and Markings
4. Recognition of Undeclared Hazardous Materials
5. Emergency Procedures
6. Hazardous Materials Incident and Discrepancy Reporting

Provisions for Passengers and Crew

1. Provisions for Passengers and Crew
